

## 2003 Automotive News PACE Awards Finalist Going with the flow

---

### **Intermet Corp.**

Troy, Mich.

**Category:** Manufacturing Process & Capital Equipment

**For:** Pressure-Counter-Pressure Casting

Intermet has developed a process that allows aluminum to be cast quicker and in higher volume than in the past, making it a good choice to replace traditional iron castings. Its Pressure-Counter-Pressure Casting innovation uses a combination of pressure and counterpressure to control mold filling.
